

Unforgettable experience in Canada

U.C.

My experience in Toronto was in a fulfilling. At first, when I arrived to Canada, I was nervous because I didn't have confidence in my English skills. Thankfully I got used to the life in Canada immediately.

I was blessed with a great teacher and classmates. My teacher, Stefany gave us many interesting themes. She taught us not only grammar and pronunciation but also about culture of Canada. We discussed a lot and we were able to use the words and phrases which we learned in the class. Thanks for her, I now have confidence in my English.

Also, I had a great time with my host mother. This was my first homestay experience, so I was nervous as to whether I could talk to her. But she is kind and gave me a warm welcome, so I could enjoy my stay in Toronto. We talked about our own cultures. She was glad when she saw photos of me in my kimono. Her hobby is cooking, so she is very good at it. I enjoyed her dinner every day.

After class, I usually went to some sightseeing spots and popular places with my friends. There are many Japanese students in this program and I thought this would be a bad environment to study English, but there are many motivated students, so I was able to study English hard with them.

Canada has a lot of nationalities and I think it is really interesting and wonderful. When I got in the train in Canada for the first time, I was surprised because of the multiple races.

A month is too short to study English for me and this experience was very exciting, so I really want to go to Canada again someday.
